DETAILED ACTION

1. The amendment filed on 12/27/2007 has been received and fully considered.
2. Claims 1-35 are presented for examination.

Allowable Subject Matter

3. Claims 1-35 are allowed.

3.1 The following is an examiner's statement of reasons for allowance: Regarding independent claims *1, 12, and 23*, while Tcherniaev et al. teaches a transistor simulator using hierarchical data, including partitioning a circuit into a plurality of group, simulating the operation of the circuit, storing the group, extracting a group of circuit and simulating the group circuit; and Zhou et al. teaches a system and method for simulation of an integrated circuit using hierarchical input netlist, including partitioning, storing, extracting, and simulating the circuit, and Zhong teaches a circuit simulation using encoding of repetitive subcircuits, *neither of these references* taken either alone or in combination with the prior art of record disclose the port connectivity, as claimed, more specifically, wherein the port connectivity interface facilitates communication of dynamic information between the one or more driver leaf circuits and the one or more receiver leaf circuits, and wherein dynamic hierarchical data structures of the one or more driver leaf circuits and the one or more receiver leaf circuits are maintained, in combination with the remaining elements and features of the instant invention, it is for these reasons that the applicant's invention defines over the prior art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
